

QUALITY POLICY

Simple Design Works provides a high quality, professional and efficient service to ensure the satisfaction of all the requirements of our clients and all applicable statutory and regulatory requirements. This achievement will result in securing efficiency, a strong customer focus and enhancement of long-term sustainability and profitability within the company.

The Senior Management Team (SMT) will show leadership and commitment, and bear the responsibility for establishing, implementing, integrating and maintaining the quality management system.

We undertake to ensure sufficient resources are made available within the company to achieve this. We aim to ensure through communication, engagement, practical examples and training that quality is the aim of all members of the company.

Through direction and support, each employee will have a proper understanding of the importance of the quality system function, their responsibility to contribute to its effectiveness and its direct relevance to the success of the company.

Equally, every employee is responsible for, and will be developed and supported to perform the duties required by their specific role.

The company has a policy of promoting continual improvement and setting of quality objectives in line with the framework laid down within the ISO 9001:2015 standard. These objectives will address the risks and opportunities within the company as determined by the SMT.

The quality system will be monitored, measured, evaluated and enhanced regularly under the SMT's ultimate responsibility with regular reporting and communication of the status and effectiveness at all levels.

A handwritten signature in black ink, appearing to read 'KSH', is written over a light blue horizontal line.
